Break the life cycle with
NyGuard®

During the current pyrethrin shortage, we have many different products available such as **Cirrus®**, **Shockwave®**, **Sector®**, and **NyGuard®**.

Need a product to use in an "Organic" facility? Use **Pyganic Pro®**, which is OMRI certified.

Want a ready-to-use product that includes an IGR? **Shockwave®** contains dual synergized pyrethrin, esfenvalerate and **NyGuard®** for quick knockdown and long residual control of a long list of stored product insects.

Cardinal Professional Products offers a complete line of insecticides:

- Card-O-Vap 8 (Vapona, Dichlorvos, DDVP)
- Pyrocyde® Fogging Insecticides from MGK
- NyGuard® IGR (insect growth regulator)
- Onslaught®
- Cirrus®
- Riptide®
- Sector®
- Shockwave®
- Jetstream®
- Pyganic Pro®
- Cy-Kick®
- Conquer®
- And more....

Onslaught® is packaged in 16 oz, 64 oz, and 1 gallon and 30 gallon containers

Consider using **Onslaught®** as an alternative to Tempo, which has been considered the standard in the grain and food processing industry. Onslaught® micro-encapsulated insecticide consistently delivers fast knockdown and kill of the toughest insects, with cost-effective residual control.

- ◆ Controlled release technology provides longer-lasting residual control
- ◆ Effective on a broad-spectrum of insects and related pests
- ◆ Flexible-may be used indoors and outdoors, in homes and in food and non-food areas
- ◆ Grain storage applications
- ◆ No objectionable odor
- ◆ "Caution" label

The **Micron-Master® ULV System** can generate insecticide particles consistently in the 5-15 micron range which is ideal for effective fogging applications. Micron-Master® ULV foggers can be wall-mounted, cart-mounted, or truck mounted. We can custom build whatever system you need at very competitive prices. Solid brass nozzles never wear out! Easy to use and maintain.
