Pressurized Pyrethrum Capsule Suspension

KILLS:
Angoumois Grain Moths, Ants, Bed Bugs, Bees, Beetles, Caddelles, Centipedes, Chiggers, Cigarette Beetles, Clothes Moths, Cockroaches, Confused Flour Beetles, Crickets, Dermestid Beetles, Dried Fruit Beetles, Drugstore Beetles, Firebrats, Fleas, Flies, Gnats, Grain Mites, Granary Weevils, Indianmeal Moths, Lice and eggs (on clothing, bedding and furniture), Mealworms, Mediterranean Flour Moths, Mosquitoes, Moths, No-see-ums, Pillbugs, Red Flour Beetles, Rice Weevils, Sawtoothed Grain Beetles, Silverfish, Sowbugs, Spiders, Stable Flies, Ticks, Trogoderma, Wasps, Waterbugs, Weevils and Yellowjackets

FOR USE IN:
Airplanes*, Bakeries, Beverage Plants, Boats, Cabins, Campers, Campgrounds, Canneries, Dairies, Flour Mills, Food Processing Plants, Food Storage Areas, Grain Mills, Homes, Hospitals, Hotels, Industrial Installations, Kennels, Meat Packing Plants, Motels, Nursing Homes, Office Buildings, Patios, Picnic Areas, Railroad Cars, Recreational Vehicles, Residences, Restaurants, Schools, Ships, Supermarkets, Tents, Trailers, Truck Trailers, Warehouses and Zoos

1 Do not use in aircraft cabins.

ACTIVE INGREDIENTS:
Piperonyl Butoxide, Technical* .................................................. 2.200%
Octyl Bicycloheptene Dicarboximide .................................. 0.336%

OTHER INGREDIENTS:
Equivalent to 1.76% (butylcarbityl)(6-propylpiperonyl) ether and 0.44% of related compounds.

TOTAL: 100.000%

EPA Reg. No. 499-381

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID
IF IN EYES: Hold open eye and rinse slowly and gently with water for 15 - 20 min. Remove contact lenses, if present, after the first 5 min, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 - 20 min. Call a poison control center or doctor for treatment advice.

IF INHALED: Get fresh air. If not breathing, give artificial respiration. If consciousness is lost, do not give mouth-to-mouth resuscitation. Call a poison control center or doctor for treatment advice.

IN CASE OF INGESTION: Do not induce vomiting. Give 1 or 2 glasses of water. Call a poison control center or doctor for treatment advice.

NOTE TO PHYSICIAN: Contains petroleum distillate - vomiting may cause aspiration pneumonia.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: May cause eye irritation. May be absorbed through the skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Wash thoroughly after using and before smoking or eating. Avoid contamination of food, utensils and food preparation areas. Keep children and pets off treated areas until spray has dried. Food should be removed or covered before treatment. All food contact surfaces and cooking utensils should be covered before treatment. Before treating in medical care areas, remove all patients. After treatment ventilate area for 2 hr before returning patients.

ENVIRONMENTAL HAZARDS
This product is toxic to fish, birds and other wildlife. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

PHYSICAL OR CHEMICAL HAZARDS
Flammable. Contents under pressure. Keep away from heat, sparks and open flame. Do not puncture or incinerate container. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Do not spray directly into any electronic equipment such as radios, televisions, computers, etc. Do not use this product in electrical equipment (where there is exposed wiring or contact points) due to possibility of short circuits and shock hazard. Product should only be used when can temperature is above 60°F. If can temperature is below 60°F, store at room temperature until a temperature above 60°F is reached.

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

SHAKE WELL BEFORE USING.

HOW TO USE MICROCARE
CRACK & CREEVIE® TREATMENT: Use Microcare with the supplied actuator and injection tubes. Inject Microcare into cracks and crevices or void spaces where insects may be harboring, living and breeding. Place injector tip into cracks, crevices, holes and other small openings. Release approximately 1 sec of product. For light infestations, move injector tip along cracks while treating at the rate of 3 linear ft per second. For heavy infestations, move injector tip along at 1 linear ft per second. For closed voids, calculate the void’s cubic area and treat at the rate of 5 - 10 sec/3 cu ft. Several holes may be required in long running voids.
SPOT TREATMENTS: Spot treatments are permitted for certain applications. See specific instructions. To make a spot treatment release product onto the surface. Do not exceed 2 sq ft for each spot treatment. Repeat as necessary on the same area once every 7 days.

SPACE AND SURFACE TREATMENTS: Space and general surface treatments are permitted for certain applications. See specific instructions. Repeat as necessary, but not more than once every 7 days.

INDOOR TREATMENTS

CRAWLING INSECTS (Including Cockroaches, Crickets, Firebrats, Silverfish, Spiders): Make spot treatment and/or Crack & Crevice injections into hiding places such as cracks and crevices, moist areas, openings around pipes and sinks, under refrigerators and meter boxes. Treat floors, walls, under pallets, behind shelves and drawers. Apply directly on insects in these locations where possible. Repeat as necessary, but not more than once every 7 days.

FLEAS AND TICKS: Apply Microcare to pet beds and resting quarters, adjacent cracks and crevices, baseboards, carpets and floor coverings, between and under cushions of upholstered furniture and other areas where pets may be present. Entire carpets may be treated. Thoroughly vacuum infested area to capture as many adult fleas as possible. Apply a light, dry vacuum bag and dispose. Applications to most surfaces should be as light as possible, approximately one 20 oz can/412 sq ft. It may be necessary to use a higher volume of spray, approximately one 20 oz can/250 sq ft, on long, dense shag carpets. Old bedding of pets should be replaced with clean, fresh bedding after treatment. Animals should not be sprayed with this product.

BOOKLICE & SILVERFISH: Inject into cracks and crevices with clean, fresh bedding after treatment. Animals should not be covered before treatment. This treatment is supplemental to good housekeeping, since it will have no effect on insects within packaging. Injected food packaging should be destroyed.

FLYING INSECTS - Flies, Moths, Gnats: Close all windows and doors and direct fog upward at a rate of 2 - 4 sec/1,000 cu ft. Dispense in all locations. Keep area closed for at least 15 min. Do not remain in treated area. Repeat application as necessary, but not more than once every 7 days.

AIRCRAFT CARGO AREAS: Direct fog upward at the rate of 2 - 4 sec/1,000 cu ft. Dispense in all locations. Keep area closed for at least 15 min. Do not remain in treated area.

INDOOR AND OUTDOOR TREATMENTS

CARPETER ANTS: Locate source of infestation. Inject 5 - 10 sec of product into insect tunnels and cavities. Treat trails, points of entry or exits from voids such as around doors and windows. Treatment of trails on tree trunks or fences is permitted.

FOR ACTIVE AND HIBERNATING STAGES OF BOXELDER BUGS, ELM LEAF BEETLES, CLOUSER FLYS AND CLOVER MITES: Inject cracks and crevices and/or voids where these insects may be harboring or hibernating. Infested areas include, but are not limited to, cracks and crevices, behind siding, wall voids, around window and door frames. Repeat as necessary, but not more than once every 7 days.

OUTDOOR TREATMENTS

FLYING INSECTS: Treat outside surfaces of screens, doors, window frames or wherever these insects may enter the room. Treat surfaces around light fixtures on porches, in garages and other places where insects light or congregate. Repeat as necessary. Treat normal fly resting areas such as ceilings, upper corners of the area, eaves, around doors, light fixtures and other surfaces known to attract flies. Hold can 1 - 2 ft from target surface and apply at the rate of one 20 oz can/250 - 375 sq ft of surface area. Treat so as to lightly mist the target surface. For best results, initiate treatment at the beginning of the fly season and repeat weekly, or as necessary, during periods of heavy fly activity.

TO KILL MOSQUITOS OUTDOORS: To kill adult mosquitoes, treat shrubs, vegetation and other areas where mosquitoes may rest. Direct application of this product to any body of water is prohibited. Apply at the rate of one 20 oz can/250 - 375 sq ft of surface area.

CARPENTER BEES: Locate entrance holes. Inject 5 - 10 sec of product into entrance holes. Seal bee entrances after application.

PERIMETER TREATMENT: For crawling insects, including but not limited to Ants, Cockroaches, Crickets, Earwigs, Pillbugs, Spiders and Scorpions. For treatment of infestations of these insects in outdoor areas which are landscaped, planted, mulched or unmaintained. For ants, treat mounds and runways. Repeat applications as infestation warrants and as reinfestations occur. Treatment may be repeated once every 7 days. Apply Microcare to cracks and crevices where insects may enter premises. Areas to be treated include, but are not limited to, weep holes, under siding, wall voids, soffits, around attic vents, cracks and crevices, and openings around windows, doors and pipes. Treatment of infested fences and tree holes is permitted. To help prevent infestations of buildings, treat a band of soil 3 - 10 ft wide around and adjacent to the building. Also, treat the building foundation to a height of 2 - 3 ft and where pests are active and may find entrance. A rate of 14 sec/100 sq ft is desirable.

CRAWLING INSECTS: For treatment of localized infestations of these insects in outdoor areas which are landscaped, planted, mulched or unmaintained, treat infested areas. For ants, wet hills and runways. Repeat applications as infestation warrants and as reinfestations occur. Treatment of infested fences and tree holes is permitted.

CAMPGROUNDS, PATIOS AND PICNIC AREAS: Treat in the direction of a slight breeze away from user that allows the fog to drift into areas of infestation. Treat while moving away from the treated areas. Allow spray to dissipate before occupying the treated area. Direct treatment from a distance of 4 - 6 ft from flowering plants, shrubbery and grass where the insects may be resting. Avoid heavy foliage of foliage. Treat on around benches, blankets, chairs, garbage cans, patio furniture and tables. Allow spray to dry before occupying the treated area.

BOATS, CAMPERs, TENTS, TRAILERs AND RECREATIONAL VEHICLES: Treat area for 1 - 3 sec. Leave area unoccupied for 15 min.

CABINS: Close all windows and doors and direct fog upward at a rate of 2 - 4 sec/1,000 sq ft. Dispense in all locations. Keep area closed for at least 15 min. Do not remain in treated areas.

TREATMENT FOR IN GROUND SERVICE BOXES - Ants, Centipedes, Clover Mites, Cockroaches, Crickets, Earwigs, Fire Ants, Millipedes, Scorpions, Silverfish, Soobugs, Spiders (such as Black Widow and Brown Reclus), Springtails: Use actuator to treat open boxes and exposed surfaces. Do not contact any electrical wiring or mechanical parts of meter.

APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS

FOOD AREAS - APPLICATION LIMITED TO CRACK & CREVICE TREATMENT ONLY: Includes areas for receiving, storing, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed processing systems (milks, dairies, edible oils, syrups). Serving areas (when food is exposed and facility is in operation) is also considered a food area. Apply prescribed amounts of Microcare directly into cracks and crevices or voids using injection tube in points between different elements of construction, between equipment and floor, openings leading to voids and hollow spaces in walls, equipment legs and bases where insects hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food, food utensils or food processing surfaces. Food should be removed or covered before treatment. All food contact surfaces and cooking utensils should be covered before treatment.

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK & CREVICE TREATMENT ARE NOT PERMITTED.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry area away from heat or open flame and inaccessible to children.

PESTICIDE DISPOSAL: Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Do not puncture or incinerate! Empty container by using the product in accordance with the label directions. Offer empty container for recycling, if available, or place in trash if allowed by state and local regulations. If container is partly full, contact your local solid waste agency or call 1-800-CLEANUP for disposal instructions.

Contains no CFCs or other ozone depletory substances. Federal regulations prohibit CFC propellants in aerosols.

NOTE: This specimen label is for informational purposes only. All uses may not be approved in all states. See labeling which accompanied product for Directions for Use or call 800-777-8570 for more information. For automatic specimen label updates, register at www.whmrg.com.
