MOISTURE RESISTANT WEATHER RESISTANT

ACTIVE INGREDIENT:
Bromethalin (CAS No: 63333-35-7) 0.01%
OTHER INGREDIENTS 99.99%
TOTAL: 100.00%

KEEP OUT OF THE REACH OF CHILDREN
CAUTION
SEE SIDE/BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS

This Product May Only Be Used Inside and Within 100 Feet of Buildings or Inside of Transport Vehicles (Ships, Trains, or Aircraft)

EPA REG. NO. 67517-66-56
EPA EST. NO. 56-OH-1

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION:
Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from children, domestic animals, and pets. Do not get in eyes, on skin, or on clothing. All handlers (including applicators) must wash hands with soap and water before eating, drinking, chewing gum, using tobacco, or using the toilet and change into clean clothing.

USER SAFETY REQUIREMENTS
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions are available, use disposable gloves, protective eyewear, and clothing such as long-sleeved shirts and long pants.

FIRST AID

IF SWALLOWED:
Call a poison control center, doctor, or 1-800-283-4453 immediately for treatment advice.
Have person sip a glass of water if able to swallow.
If vomiting occurs, do not induce vomiting; call a poison control center or doctor.
Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:
Take off contaminated clothing.
Rinse skin immediately with plenty of water for 15-20 minutes.
If a person is wearing a poison control center or doctor for treatment advice.

IF IN EYES:
Hold eye open and rinse slowly and gently with water for 15-20 minutes.
Hydrate contact lenses, if present, after first 5 minutes; then continue rinsing eye.
If a person is wearing a poison control center or doctor for treatment advice.

TREATMENT FOR POISONING

If animal eats bait, call veterinarian or 1-800-283-4453 at once.
NOTE TO PHYSICIAN OR VETERINARIAN
Contains the nerve poison Bromethalin. This is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Subclinical symptoms if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroids.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to mammals and birds. Dogs and scavenging mammals and birds might be poisoned if they feed on animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff may also be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsates.

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.
READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides.
To help prevent accidents:
1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of the reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are filled, units must be secured or otherwise immobilized. Even stronger baits stations are needed in areas open to hooded livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled and un consumed bait as specified on this label.
NOTE: Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used if children, pets, non-target mammals, or birds access the bait.

USE SITES: This product can only be used to control Norway Rats, Roof Rats, and House Mice and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and piers of terminal buildings and related structures around and associated with

MAY BE HARMFUL IF EATEN BY CHILDREN OR PETS

All-Weather BAIT BLOCK RODENTICIDE Effective Indoor and Outdoor Rodent Control

KILLS NORWAY RATS, ROOF RATS & HOUSE MICE
Norway Rats, Roof Rats and House Mice usually consume a toxic dose in a single night’s feeding but it may take two or more days from time of bait consumption for them to die. Due to Stop Feed Action, rodents cease feeding after consuming a toxic dose. This product is effective against anticoagulant-resistant house mice and rats.

NET CONTENTS: 128 X 0.5 oz. BLOCKS

DIRECTIONS FOR USE (CONTINUED):
These sites. Fence and perimeter baiting beyond 100 feet from a structure as defined above is prohibited. This product must not be applied directly to food or feed crops.

USE RESTRICTIONS: Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come in direct contact with food. Do not broadcast bait. Do not apply further than 100 feet from buildings. This product may only be applied by licensed pest control operators (PCO). Do not use this product in individual containers holding less than 4 pounds of bait.

Burrow baiting with JT EATON™ TOP GUN™ ALL WEATHER BAIT BLOCKS is prohibited.

SELECTION OF TREATMENT AREAS: Determine areas where rats and house mice will most likely find and consume the bait. Generally, these are along walls, in dropped ceiling edges, in and around buildings, in corners and concealed places, between food and walls, or in locations where rats and house mice or their signs have been seen.

Use as much alternative food accessible to rodents as possible.

APPLICATION DIRECTIONS: The active ingredient in this product is different from anticoagulant rodenticides. Individual rats and mice cease feeding after consuming a toxic dose. For use in sewers, please refer to the instructions provided by the manufacturer’s literature. Where there is heavy feeding or where there is continued evidence of rat and mouse activity, maintain bait at least one week and continue baiting until all signs of rat and mouse activity have ceased or it becomes clear that the remaining rats and mice are not attracted to the bait.

RATES: Wearing gloves, apply 1 to 2 bait blocks per placement in infested areas. Space placements at intervals of 20 to 30 feet.

HOUSE MICE: Wearing gloves, apply 1 or 2 bait blocks per placement in infested areas. Space placements at intervals of 15 to 20 feet.

FOLLOW-UP: Adjust the amount of bait applied to the level of rat and mouse feeding expected at each bait placement location. Highest bait consumption is expected to occur on the first day or two after treatment. After several days, inspect bait placements and replenish bait at sites where there is heavy feeding or where there is continued evidence of rat and mouse activity. Maintain bait for at least one week and continue baiting until all signs of rat and mouse activity have ceased or it becomes clear that the remaining rats and mice are not attracted to the bait.

Wearing gloves, collect and properly dispose of all dead rats and mice and leftover bait. To discourage reinvasion: Limit sources of rat and mouse food, water, and harborage as much as possible. If reinestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill the container. Triple rinse (or equivalent) then allow for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration. In most states, burning is not allowed.

NOTICE OF WARRANTY
To the extent consistent with applicable law, buyer assumes all responsibility for safety and use not in accordance with directions for use.
